

Field of activity Oil & gas - Chemical

Project **Improvement of propane pumping system, Pisco (PERU)**

Year 2016

Location Pisco (PERU)

Client **PLUSPETROL**

Facility features

PLUSPETROL PERÚ CORPORATION S.A., is in charge of the operation of the Pisco Fractioning Plant. The current propane pumping system is fitted with two pumps and this project has been planned to increase the loading speed of trucks by adding two vertical pumps connected to the new Bullets already installed.

Scope/description:

Supervision and development of complementary detail engineering, supplies, construction, pre-commissioning, commissioning and project start-up assistance.
